Executive Summary

The Eye Care Program of Manabik Shahajya Sangstha (ECP-MSS) has registered notable growth during 2022-2023 despite challenges. The number of eye camps conducted, eye camp coverage areas, patients screened, students screened, the number of surgeries performed successfully, spectacles, and medicines distributed have all increased significantly during the period.

During the reporting period, ECP-MSS conducted 99 public eye camps, having screened a total of 31,527 patients, and performed surgeries on 4,991 patients from 18 districts, spread over 41 Upazilas. Moreover, 8,080 spectacles and 2,823 eye drops were given to underserved patients. The number of partner hospitals rose to 26.

Of these 99 public eye camps, 59 were implemented with the mobile eye clinic - Noyon Tori (NT) 1 & 2, where 12,624 underserved patients were screened and received free eye care services. A total of 2,740 spectacles were given out. From these eye camps, 1,702 surgeries were performed.

Under the School Sight Testing Program (SSTP), a total of 3,576 underserved students' eyes (1,913 girls and 1,663 boys) were examined at 28 schools in Nilphamari, Thakurgaon, and Dhaka districts. All SSTPs were conducted by NT. During the year, ECP distributed 69 eye drops and 44 custom-made eyeglasses to the students.

ECP-MSS runs awareness campaigns at the eye camps and other programs to raise community awareness of basic eye care. For awareness raising among people, 32,000 flyers were distributed, with 110 posters, and 67 interactive presentations made by the ECP community educators for the school children.

All ECP-MSS activities are carried out from individual and corporate donations complemented by a generous grant from MSS. During the reporting period, an amount of Tk. 89.96 lacs was raised from our esteemed donors – both individual and corporate.

MSS President visited an eye camp organized for Baridhara MLSS workers

Introduction

A group of students from Dhaka Residential Model School and then the University of Dhaka founded MSS in 1974 during a devastating flood and famine. MSS is now a leading non-governmental organization in Bangladesh. Providing humanitarian help was the initial focus of MSS before it shifted its attention to eradicating poverty among marginalized people through microfinance and development. With a goal of creating a society free of poverty where there is equality among citizens and citizens' rights and human dignity are respected. MSS also works to reduce poverty among marginalized groups. In addition, MSS works on promoting food security, women and children's rights, nutrition, health services, housing, and education.

In June 2014, Manabik Shahajya Sangstha (MSS), invigorated with its experience in providing eye care services in Bangladesh, established its Eye Care Program (ECP-MSS) with the goals of identifying and treating preventable blindness among the disadvantaged, fostering community awareness and education on eye health, increasing capacity and access to eye care services, among others.

To help marginalized people, ECP offers a range of eye care services to those in need in both urban and rural locations, ECP offers free Public Eye Camps. Underserved school children are given exclusive services through its School Sight Testing Program (SSTP). ECP reaches out to industrial workers through its Industrial Sight Testing Program (ISTP). In addition to offering comprehensive eye care at these eye camps by providing medicines and eyeglasses, when necessary, the Healthy Eyes for Road Safety (HERS) program addresses the eye care needs of public transportation workers. Primarily, cataract patients are identified and get surgery immediately to regain their lost vision. Eye care awareness activities are carried out by handing out leaflets and posters, showing videos, and making interactive presentations at the eye camps.

Cheerfull school students at an eye care awareness presentation

Eye Camps

One efficient approach to delivering eye care services quickly to a large population is by organizing public eye camps. These camps allow us to offer eye care treatment to numerous underserved individuals who come for eye care services. Additionally, we can distribute eyeglasses and medications to these patients. The eye camps also serve to identify individuals with cataracts who are immediately transported to our partner hospitals for surgery. Importantly, all these services are provided at no cost to the patients. The eye camps are conducted in collaboration with the local union parishad or educational institutions. The partner hospitals of ECP-MSS offer the necessary technical support for organizing the eye camps and performing surgeries while ECP staff and volunteers provide support services to the camps.

Doctor is screening a patient in an eye camp

Services provided:

1. 99 Public Eye Camps were organized in 18 Districts and 41 Upazilas.
2. 31,527 patients got free eye care services; among them, 15,404 were female and 16,123 were male.
3. 8,080 Eyeglasses were provided to correct refractive errors.
4. 2,823 Eye drops were given to treat allergies and other problems.
5. Provided additional health services like measuring Blood Pressure and Random Blood Sugar tests.
6. Referrals for complex eye problems.

MTB Sponsored Eye Camps

To advance ECP's goal of reducing curable blindness among the underprivileged, the Mutual Trust Bank -Foundation (MTB-F), the corporate social responsibility arm of the Mutual Trust Bank (MTB), a renowned private commercial bank in Bangladesh, continued to support the ECP of MSS through financial contribution to implement a series of six eye camps in 2022. Under this six-eye camp series, ECP provided free treatment, prescriptions, essential medicines, reading glasses, and surgeries to reduce preventable blindness among disadvantaged individuals.

A total of 2,673 patients (female–1526; male–1147) received eye treatment from qualified doctors equipped with modern eye screening instruments at these six eye camps at Parshuram, Sona Gazi, and Dagon Bhuiyan upazilas in Feni district and Jamalpur Sadar, Madarganj and Sharishabari upazilas of Jamalpur district.

Six hundred and sixty-five (665) patients received free eyeglasses to correct refractive errors and provided 2,830 medicines. Two hundred sixty-seven (267) surgeries were suc-

cessfully performed, of which 225 Cataracts; 23 Pterygium; 14 DCT; and 05 DCR at ECP's three partner hospitals: Bangladesh Jatiya Andha Kalyan Somity (BJAKS) – Cumilla, Ispahani Islamia Eye Institute & Hospital, Jamalpur; and Professor M.A. Matin BNSB Base Eye Hos-

Deputy Managing Director of MTB, Mr. Rais Uddin Ahmad inaugurated an Eye Camp in Madarganj, Jamalpur

pital, Sirajganj. These camps brought eye care treatment to the people who needed those most. Patients at the camp attended the awareness activities by receiving leaflets and posters with basic eye care advice.

ECP reached out to *char* area:

Chars are landmasses formed through the sedimentation of huge amounts of sand, silt and clay over time carried by the mighty rivers and their numerous tributaries. Flooding, land erosion, poor communication, unemployment, food insecurity, and poor health care combine to make the lives of char residents much tougher than mainland people in Bangladesh. Chars are home to 5 million people in Bangladesh.

Patient consulting with Doctor at Jadur Char Eye Camp

ECP–MSS decided to extend its services to the people in Char areas to make eye care accessible to them. Thus, ECP–MSS conducted an eye camp in the Jadur Char union of Rowmari upazila, Kurigram on 21 November 2022. In this eye camp, 351 patients were examined. One hundred and four (104) reading glasses and 710 medicines were distributed among the patients. Of the 55 cataract surgery patients identified 37 surgeries were performed in our partner hospital Ispahani Islamia Eye Institute and Hospital, Jamalpur.

Noyon Tori

Upon analyzing the Noyon Tori mobile eye clinic's successful operations and the expansion of its services deeper into the rural areas, ECP-MSS procured a minibus – Noyon Tori - 2, which safely carries the eye screening equipment, the medical team and also transports surgery patients from the campsite to the partner hospital and drop them back to the campsite following successful surgery.

Throughout 2022-23 with Noyon Tori, 59 eye camps were conducted where 12,624 underserved people were screened and received free eye care services. A total of 2,740 spectacles were given out. From these eye camps, 1,702 surgeries were performed – these surgeries were sponsored by MSS. In addition, the NT team screened a total of 3,576 children from 28 schools. These SSTPs were conducted in schools located in Nilphamari, Thakurgaon, and Dhaka districts.

Noyon Tori-2 minibuss procured for smooth operation of ECP activities

Other Eye Camps:

EYE CAMP IN BARIDHARA FOR MLSS: Eye Camp for underprivileged people in Baridhara Society is another great achievement of the ECP. In April 2023, ECP served 469 people, of which, most of them are maids, security guards, drivers, and rickshaw pullers.

Bangladesh Garment Manufacturers and Exporters Association (BGMEA) identified and recognized the need for providing eye care services to its workers and staff. The management identified ECP–MSS based on its successful track record, to dispense quality eye care services at discounted and affordable rates for the workers and staff of the garment factories. BGMEA took the initiative as part of their Corporate Social Responsibility. BGMEA realized the necessity of healthcare programs targeting their employees. ECP agreed to conduct an Eye Care Campaign as part of its ongoing program to make quality eye care available to the employees of BGMEA at affordable rates in their factory premises. ECP's eye camp was conducted at BGMEA Complex in Uttara, Dhaka on 28-29 May 2023.

BGMEA President observing eye care service at BGMEA while distributing spectacles and medicine to the patients

Surgeries

Primarily cataracts and other eye surgeries play a crucial role in addressing the eye health needs of underserved populations in Bangladesh. Cataracts, the clouding of the eye's natural lens can severely impair vision and reduce the quality of life for those affected. However, due to limited access to eyecare services and financial constraints, many individuals in underserved communities can not receive the necessary surgical intervention.

Services Provided:

In response to this pressing issue, ECP-MSS started to provide cataract surgeries to those in need. The ECP effort aims to eliminate barriers to access and ensure that individuals from all socio-economic backgrounds can have healthy eyes and improve their overall well-being.

ECP SURGERY HIGHLIGHTS 2022-23

Total Surgeries: 4991

Female: 2611

Male: 2380

Left Eye: 3019

Right Eye: 1972

Post-surgery patients

Case Stories

Ajjul, 65, is a poor and helpless old man with one blind eye. Five years ago, he lost his left eyesight because of improper medical care. He has no land or other assets and works as a day laborer. He has children, but they do not give him any financial support. He and his wife consequently struggle to make ends meet while dealing with several challenges by working on other people's lands.

Of late, he found a problem in his other eye but was unable to get treatment due to the burden of poverty. On June 15, 2023, he heard of an eye camp organized by the "ECP-MSS" at the Haragach Pourashava office premises, Rangpur. He went to the eye camp, and the doctor found a cataract in his other (right) eye. Camp organizers took him to the Rangpur Eye Hospital, where the operation was performed on his right eye. With the operated eye, he can now see again. "I am grateful to all those who helped me get this free surgery," he said, "and I will have them in my prayers."

Aisha, 70, is a street beggar living in Vatara, Sharishabari, Jamalpur. Her husband passed

away several years ago. She is a poor woman. There is no one to look after her. She suffered from Dacryocystectomy (DCT) and a cataract in her right eye since last year. She said, "I felt giddy and could not get up from the bed. I could not see things clearly even from a little distance and objects appeared blurred like fog".

Due to poverty, she could not go to the hospital for the surgery. ECP-

MSS identified her at an eye camp in Sharishabari, Jamalpur sponsored by the MTB foundation, and facilitated her eye surgery at the Ispahani Islamia Eye Institute and Hospital, Jamalpur branch. After successful DCT and Cataract surgery, Aisha now can see things clearly. She is back to her normal life. She thanked MTB-F and ECP for restoring her eyesight.

Keramot Ali, 65, is from Mogolhat of Lalmonirhat district. Keramot Ali worked as a day laborer to earn a living for his family. However, his sight was deteriorating over the years, becoming cloudy and making his life difficult. Keramot Ali delayed going to an eye hospital due to the costs involved, which

meant he could not get the correct treatment for his condition. Keramot Ali's children are married and struggling to sustain their own families, thus he became helpless. This put immense pressure on his already ailing wife. However, all these was about to change for the better, when Keramot Ali's neighbour, a retired headmaster, handed him a leaflet that read, "Free Eye Camp", which was to be held in Mogolhat, Lalmonirhat. He made sure to attend this eye camp organized by ECP's team of experienced ophthalmologists, technicians, and nurses. The specialist team examined Keramot Ali and diagnosed cataracts. ECP scheduled him for a quick 10-minute procedure under local anesthetic to remove the cataract. He recalls the moment he was filled with joy as the bandages were removed and he could see his children and the world clearly again.

Mofiz Sordar, 80 years old is from Bagmara upazila in Rajshahi, Bangladesh. Mofiz

Sordar worked as a day laborer to earn a living for his family. However, his sight was deteriorating over the years, becoming cloudy and making his life difficult. He delayed going to an eye hospital due to financial constraints, which meant he could not get the correct treatment for his condition. Mofiz's children were all married and struggling to sustain their households.

On May 27, 2023, he heard of an eye camp organized by "Eye Care Program-MSS". Upon hearing about the eye camp, he went to the camp where the doctor found a cataract in his left eye. Camp organizers took him to the Prof. M A Matin Memorial BNSB Eye Hospital, where the operation was performed entirely for free in his left eye. He was excited with joy when his bandages were removed and could see again. He thanked Allah and team ECP and his donor for giving him a second life.

School Sight Testing Program (SSTP)

The School Sight Testing Program (SSTP) addresses the vision needs of underprivileged children by providing comprehensive eye care services within the school setting. This initiative recognizes that visual impairments can significantly impact a child's academic performance and overall development. However, due to various barriers, such as lack of awareness, limited access to healthcare, and financial constraints, many underprivileged children do not receive the necessary vision care. The SSTP seeks to bridge this gap by bringing eye care services directly to the schools serving underprivileged communities.

The program involves a team of trained eye care professionals, including optometrists and technicians, who visit participating schools to conduct comprehensive vision screenings and treatment for students.

ECP undertook to cover all schools of Khagakharibari Union, Dimla, Nilphamari, under its SSTP.

Our esteemed donor visited SSTP camp

Services Provided:

- School Screened 28,
- Students Screened 3576,
- Girls 1913, Boys 1663,

- Medicines Provided 69,
- Eye Problem Pointers Placards 56,
- Awareness Flyers 3600,
- Awareness Posters 140,
- Awareness Presentation 110.

Students get custom-made eyeglasses

Awareness Raising

Many eye conditions and diseases can be prevented or treated effectively if detected early; therefore, raising awareness about basic eye care practices such as regular eye exams, protection from harmful Ultraviolet (UV) rays, and maintaining a healthy lifestyle can help individuals take proactive steps to prevent avoidable blindness. Awareness campaigns help individuals understand the importance of basic eye care and seeking professional eye care services.

Awareness activity conducted by using flyers, posters, and placards

Basic eye care awareness empowers individuals to take control of their eye health. By understanding the importance of routine eye exams, maintaining a healthy lifestyle, and protecting their eyes from potential hazards, individuals can actively engage in preventive measures and make informed decisions about their eye care. For awareness raising among people, 32,000 flyers, 110 posters, with 67 interactive presentations made by the ECP community educator for the school children.

By fostering a culture of eye health awareness, we can make significant strides in preserving vision and promoting well-being for individuals and communities.

Past Activities

Industrial Sight Testing Program (ISTP): The ISTP's main goals are to offer industrial workers comprehensive eye care services at reasonable prices, correct refractive problems, and take care of other eye conditions so that they have healthy eyes that lead to higher and quality output. Since ECP began its ISTP in 2018, it has served eight (8) factories, examined 6,696 employees, delivered 1,687 pairs of custom-made spectacles, and gave out 2,125 medicines. Fifty cataract surgery patients were identified and 24 operations were carried out. The workers contributed some of the cost themselves, and the factory owners subsidized some of it.

Healthy Eyes for Road Safety (HERS): In 2019, ECP conducted a survey of public road transport drivers to better understand the dire state of road safety and discovered that an alarming 70% of the drivers had eyesight issues. ECP decided to offer transport workers with eye care services that was both economical and of high quality at their terminals. On February 24–25 and March 11–12, 2019, the Tejgaon truck stand and the Syedabad bus terminal, respectively, hosted a sight screening program for public transportation drivers in collaboration with the Al-Noor Eye Hospital where 545 employees of public transportation were screened; 291 employees received prescription medications, and 155 employees received eyeglasses. One hundred forty-eight drivers were screened of which 101 had refractive errors and prescribed spectacles. Twenty-four cataract patients were identified, of which 11 were drivers. ECP subsidized eye examinations, the cost of spectacles, medicines and surgery.

Partnership

Our eye care initiatives are conducted in partnership with hospitals situated across different districts in Bangladesh. These partner hospitals play a significant role in supporting underprivileged patients in need of eye care and surgery. They provide technical support, from identifying patients to arranging transportation to and from the hospital. The services provided by the partner hospitals encompass a range of essentials, including heavily discounted rates for surgery that cover expenses such as transportation, hospital stay, pre-surgery tests, lenses, the surgical procedure, as well as post-surgery follow-up care and medications.

List of Partner Hospitals

1	Shafiuddin Ahmed Foundation, Thakurgaon
2	Shahitun Nesa Eye Hospital, Narayanganj
3	Prof. M A Matin Memorial BNSB Eye Hospital, Kalibari, Sirajganj

Our Donors and Fund Raising

Our respected donors are our program's most important pillar. Contributions from donors are essential to the operation of our programs. They donate significant amounts of their ZAKAT to ECP each year to improve and change the lives of those in society who are underserved. Beyond our yearly fundraising drive, both individual and corporate supporters make major donations to support ECP programs throughout the year.

In the year 2022-23, ECP donors increased to 326 from 300 - a growth of around 9%. Among our donors, 318 are individual donors (167 male; 151 female), and eight are corporate donors. Most of our donors (289) live in Bangladesh, while the remaining 37 are from abroad (USA, Canada, Australia, and the UK). During the reporting period an amount of Tk. 89.96 lacs was raised from our esteemed donors – both individual and corporate.

Every year, MSS contributes a substantial amount of money to support program activities such as eye camps, surgery, and spectacles costs. In addition, MSS bears the office and overhead costs of ECP.

Manabik Shahajya Sangstha's Eye Care Program continues to provide eye care services through a variety of eye camps catering to the underserved and underprivileged people of remote, rural areas and urban areas. ECP is providing access to quality and affordable eye care services.

As of June 2023, ECP, in conjunction with its 26 partner hospitals, examined 1,81,318 underserved people at 376 free public eye camps; 172 schools attended by underprivileged children got free services under its School Sight Testing Program; workers of eight factories received treatment under the Industrial Sight Testing Program; transport workers at two truck/bus terminals received treatment under the Healthy Eyes for Road Safety. ECP provided 37,278 eyeglasses; 8,413 medicines and performed 16,631 cataract surgeries. ECP continues to expand its capacities to do more for the underserved people.
